16 OCT 1985

The Honorable Charles McC. Mathias  
Chairman  
Joint Committee on Printing  
Congress of the United States  
Washington, D.C. 20510

Dear Mr. Chairman:

In response to your memorandum to Heads of Departments and Agencies requesting participation in a Joint Committee on Printing (JCP) Survey of Government Printing Office (GPO) customer needs, I have enclosed a copy of the survey form which has been forwarded to the JCP Survey Team. Based on the success we experienced in dealing with GPO's Rapid Response Center and Customer Services Division in 1985, we intend to submit approximately 70 requests for form work and binding services this fiscal year. This Agency commends the JCP and GPO for their efforts toward enhancing the level of support for customers in the Washington Metropolitan Area and for applying what was successful locally to the GPO field facilities.

Sincerely,

/s/Charles A. Briggs

TO: Heads of all Federal Departments and Agencies

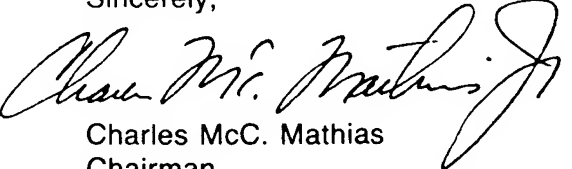

On October 1, 1984, Chairman Annunzio established a pilot program at the Government Printing Office, Rapid Response Center (RRC) to provide a new level of comprehensive service in the National Capital Area. The facility is being upgraded and modernized and the addition of a procurement staff has provided a new dimension to the RRC's ability to respond to customer needs. All changes were based on the results of a customer survey which defined equipment needs and contract specifications. The results for Washington, DC, Northern Virginia, and Maryland customers have been most positive.

The response to the pilot program has convinced the Joint Committee on Printing that this approach could potentially be applied to all of the Government Printing Office Regional Printing Procurement Office and Field Printing Plants. For this reason, the Joint Committee will request the Public Printer to allocate appropriate resources to all of these offices to allow them to provide the same comprehensive level of service offered by the RRC. This new policy and direction will go into effect immediately. However, in order to maximize the potential for success, your agency is requested to participate in a JCP national survey of customer needs (see attached). Many of your offices will also be sent copies of the survey directly from the GPO Regional Offices. The results of this survey will be used to project workload levels, to aid in the modernization and upgrading of the facilities. We request that your local offices respond to the Joint Committee by October 15, 1985. Follow-up visits may be made by a survey team. Survey results will be used to determine the ultimate configuration of each location.

During the transition period from the existing configurations to full implementation of this concept, you will see a wide variety of changes taking place. I am pleased to announce that the first such change about to take place is the establishment of a number of satellite offices outside of the existing Regional office cities. Between now and the completion of all of the changes that are to come, every effort will be made to satisfy agency mission requirements.

With best wishes,

Sincerely,

  
 Charles McC. Mathias  
 Chairman

The Honorable Frank Annunzio  
Chairman  
Joint Committee on Printing  
Congress of the United States  
Washington, D.C. 20510

Dear Mr. Chairman:

In response to your memorandum to Heads of Departments and Agencies concerning the establishment of the Rapid Response Center (RRC), I am submitting a copy of the survey form which has been forwarded to the Joint Committee on Printing (JCP) Survey Team. I am pleased to report that during this first year, this Agency will submit at least 25 requests for fast-turnaround form work to be completed at the RRC. This figure does not include an additional 100 requests we anticipate sending to the Government Printing Office, Customer Services Division for outside contractors.

This Agency commends the JCP for planning and establishing the RRC. We will make use of your services when possible and wish you much success in providing expeditious printing support for the Washington Metropolitan Area.

Sincerely,

TO: HEADS OF ALL FEDERAL DEPARTMENTS AND AGENCIES

At the initiative of the Joint Committee on Printing, the Government Printing Office has recently completed development of a new category of contracts designed to provide agencies with quick-schedule, short-run printing services. These new contracts have been designated as Agency Direct-Deal/Contractor Direct-Bill term contracts, and they are available to provide timely delivery of quick printing requirements at a minimum cost to the agency.

To achieve these results, each contract is customized from a menu of services and features to provide the exact quick-printing requirements at each agency site. No unneeded features or services are included in the contract. This greatly simplifies agency orders that are placed directly, and it relieves the contractor of the expense of stocking a wide range of supplies that may be ordered only infrequently.

Since these contracts provide for the agency to place work directly and for the contractor to bill the agency directly following delivery of work, the Government Printing Office staff will not normally be involved in assisting in the day-to-day flow of work. This allows further savings to the agency because there will be no GPO surcharges on processed orders. Rather, only a one-time annual charge of \$350 will be levied for establishing the contract. If GPO assistance is needed during the contract period, it will be available as needed. Charges for such assistance will not exceed an additional \$150 per year, regardless of what is required to meet your needs.

We expect that this new contracting method will promote the commercial procurement of some of the work now produced in agency printing plants and duplicating centers. You are encouraged to seek GPO assistance in establishing one or more of these contracts for "overload" work, or for work that no longer can be done in-house. More complex printing requirements and work requiring special handling should be directed to GPO for individual processing or placement on traditional printing contracts.

For more information on these contracts please contact JCP Professional Staff Member James Bradley or Gerald Kleiman.

With every best wish, I am

Sincerely,

*Frank Annunzio*

## Congress of the United States

### Joint Committee on Printing

October 1, 1984

TO: Heads of all Federal Departments and Agencies

In a constant effort to ensure that government agencies in the National Capital Area receive the most complete and efficient printing services, the Joint Committee on Printing has recently completed a thorough evaluation of the Government Printing Office, Departmental Service Office (DSO). This evaluation has concluded that there is a continuing need in this geographic area for a specialized printing organization, at the same location in the Washington Navy Yard, to bridge the gap between internal agency capabilities and the services that the Government Printing Office, Central Office is equipped to provide. For this reason, the Joint Committee has determined that the DSO will be redesignated as the Rapid Response Center, National Capital Area (RRC), will be modernized and upgraded and will be assigned to provide short-turnaround printing and related services within the area of Washington, DC, Northern Virginia, and Maryland. The services will include both production and procurement capabilities.

More specifically, the services to be provided by the RRC include printing jobs with work schedules of 21 calendar days from time of receipt at the RRC to the date that delivery is required, with delivery of at least 75 percent of each order to be made to destinations within the geographic area served. In addition, specialty products and services in small volumes, such as die cutting, lamination, numbering, silk screen printing, thermography, odd size and shape products, binding services, mailing services, and camera work, will also be performed.

This policy and direction for the RRC will go into effect immediately. However, in order to maximize the potential for its success, your agency is requested to participate in a survey of potential customer needs (see attached). The results of this survey will be used to project workload levels, to aid in the modernization and upgrading of the facility, and to provide a test for the proposed criteria for RRC services. We request that your response be returned to the Joint Committee by October 31, 1984. Follow-up visits may be made by a survey evaluation team.

During the transition period from the existing configuration to full implementation of the RRC concept, you will see a wide variety of changes taking place. I am pleased to announce that the first such change about to take place is the JCP's reestablishment of a printing procurement office within the RRC. Between now and the completion of all of the changes that are to come, every effort will be made to satisfy agency mission requirements.

With every best wish, I am

Sincerely,

Frank Annunzio  
Chairman
